

General precautions

- In relation to the new Coronavirus infection -

PRECAUTIONS TO BE OBSERVED

The following precautions should be taken to prevent the spread of the new coronavirus epidemic:

- **Wash your hands** regularly and thoroughly for at least 20 seconds with soap and running water, or clean your hands with an alcoholic hand disinfectant.
 - After arriving home
 - Before and during cooking
 - Before eating
 - After using the toilet
 - After sneezing, coughing, blowing the nose
 - Before and after contact with a patient
 - After contact with animals or animal faeces
- **Do not touch your eyes, mouth, face** or do so only after washing hands.
- **Ventilate regularly!**
- At your home, **clean the frequently touched surfaces as a routine** (e.g.: tables, desks, door handles, light switches, handles, toilets, taps, sinks and mobile phones)!
- **Avoid large masses** of people or confined spaces!
- **Avoid any contact with patients** who cough, sneeze, or have fever - be it for any reason (flu, bacterial infection or other)!
- **When coughing or sneezing, use a handkerchief**, which should be discarded immediately after use! If you cannot do this, do not cough or sneeze in your hands, but in the elbow of a bent arm!
- **If you are sick, keep away from others!**
 - Avoid close physical contact with others
 - Preferably use a separate toilet and washbasin
 - Use separate tableware
 - Use a separate towel
- **Only use a mask if you have respiratory symptoms** (cough, sneezing) to protect those around you.
